

Development of Interactive Scenario Based Learning in Medical Curricula across Europe

Coordinated by  CROESUS

Jurys Inn Glasgow, 5th - 6th September 2015

The objective of this CROESUS and ePBLnet Joint meeting is to explore the outcomes and future funding opportunities from both of the funded programmes, which are transforming medical curricula in several universities across Eurasia. Both programmes focus on the use of virtual patients, particularly in Problem Based Learning, to provide a more immersive experience which offer students the opportunity to manage virtual patients, and to practice making decisions safely, before their clinical attachments.

“Clinical reasoning skills enhancements with the use of simulations and algorithms”

“Establishment of the Supra-Regional Network of the National Centres in Medical Education, focused on PBL and Virtual Patients”

Development of interactive scenario based learning in medical curricula across Europe

This meeting will disseminate outcomes of the two programmes so far, and work towards a sustainability strategy that maintains and enlarges the Eurasian Supra-Regional Network. The network is focused on learning and training through authentic interactive patient scenarios. This event is open for the participation of other stakeholders that would like to be part of this growing network.
